

Merlin Maths

Merlin is a whizz in Maths. He knows his number bonds, times tables, shapes, and measures. He uses different methods to help him solve a problem and always writes down his ideas to help him develop a reason for the solution he has found.

Merlin encourages you to use TTRS and Mathletics at home to develop your confidence in school. He wants you to look for shapes, practise telling the time, try to weigh and measure items and to most importantly love discovering facts and solutions to Maths problems.
