

Carter Computing

Carter loves his IT. Whether it is programming, using an IPAD, mobile phone or laptop, Carter recognises that IT is part of our world and it has so many uses.

He knows that online safety is so important and wants to emphasise that you should keep all personal details safe and follow lessons you have each term. He knows that games and messages to friends are fun but that everyone needs to be safe online.

In school he wants you to become confident with using all the different technology and to become experts in programming and use a range of software.
