

Diana Design

Diana Design loves nothing more than to draw and design something new. She loves to work with lots of different materials to create a master piece which she then likes to appraise and evaluate to see if she could improve it.

Diana wants to see you learn how to prepare food, use fabric, wood and cardboard, use frames, levers, pulleys, switches and circuits. She wants you to draw clear designs, use labels, adapt and then evaluate the finished product you have made carefully and accurately.
